

Open letter to the Harvard Community

[Link to the letter: <https://bit.ly/harvard-against-terrorism> ; While this letter has been circulating, President Gay posted an [updated statement](#) on the war, which we were glad to see.]

We are faculty at Harvard who are deeply concerned about the events in the Middle East, as well as the safety of our students here on campus. On October 7th, Hamas launched a premeditated attack on the Israeli population. Hundreds of terrorists infiltrated Israeli towns and houses. Children were killed in front of their parents; entire families were executed. Grandmothers, mothers, and their babies were kidnapped. All in all, more than 900 Israelis were killed in a single day and the death toll is continuing to grow. There have also been deaths on the Palestinian side, including hundreds of terrorists and, tragically, civilians as well.

Every innocent death is a tragedy. Yet, this should not mislead us to create false equivalencies between the actions leading to this loss. Hamas planned and executed the murder and kidnapping of civilians, particularly women, children, and the elderly, with no military or other specific objective. This meets the definition of a war crime. The Israeli security forces were engaging in self-defense against this attack while dealing with numerous hostage situations and a barrage of thousands of rockets hidden deliberately in dense urban settings.

The [leaders of the major democratic countries](#) united in saying that “the terrorist actions of Hamas have no justification, no legitimacy, and must be universally condemned” and that Israel should be supported “in its efforts to defend itself and its people against such atrocities.” In contrast, while terrorists were still killing Israelis in their homes, [35 Harvard student organizations](#) wrote that they hold “the Israeli regime entirely responsible for all unfolding violence,” with not a single word denouncing the horrific acts by Hamas. In the context of the unfolding events, this statement can be seen as nothing less than condoning the mass murder of civilians based only on their nationality. We’ve heard reports of even worse instances, with Harvard students celebrating the “victory” or “resistance” on social media.

As a University aimed at educating future leaders, this could have been a teaching moment and an opportunity to remind our students that beyond our political debates, some acts such as war crimes are simply wrong. However, the [statement by Harvard’s administration](#) fell short of this goal. While justly denouncing Hamas, it still contributed to the false equivalency between attacks on noncombatants and self-defense against those atrocities. Furthermore, the statement failed to condemn the justifications for violence that come from our own campus, nor to make it clear to the world that the statement endorsed by these organizations does not represent the values of the Harvard community. How can Jewish and Israeli students feel safe on a campus in which it is considered acceptable to justify and even celebrate the deaths of Jewish children and families?

We recognize that Harvard has students and community members from all regions, including from the Gaza Strip. These are not easy times, and we pray for the safety of all our members

and their families. The Israeli-Palestinian conflict has a long and complex history. We hold varying opinions, but none of us endorses all of Israel's past actions. However, the events of this week are not complicated. Sometimes there is such a thing as evil, and it is incumbent upon educators and leaders to call it out, as they have with school shootings and terrorist attacks. It is imperative that our academic leadership, whose good faith we do not doubt, state this clearly and unequivocally. Further, while individuals' free speech should be protected, our leaders should make it clear that our community rejects any statements that excuse terrorist acts.

We stand with any member of the Harvard community who feels unsafe or alone and pledge to do what we can individually and collectively. We hold our hope for better days in the future. To quote [President Obama](#), "As we support Israel's right to defend itself against terror, we must keep striving for a just and lasting peace for Israelis and Palestinians alike."
